

BCH

MECHANICAL, INC.

BUCCANEERS TRAINING FACILITY

PROJECT DESCRIPTION

This is the new facility for the Tampa Bay Buccaneers that was built on the old Tampa Bay Mall site next to the stadium. BCH Mechanical was the design/builder on this project providing both HVAC and Plumbing design and construction.

The office portion contains team operations, office and physical training space as well as media relations, ticket sales, coaching offices, team meeting space and video production studios. The weight training facility and mechanical equipment is housed in the training building. Finally the maintenance building serves the two illuminated, natural turf inside practice fields.

This was a tremendously exciting project to be part of, with BCH having the responsibility of bringing comfort to our World Champion Tampa Bay Buccaneers. The glass lobby is shaped like a football, which is just one of the many unique aspects of this project.

BCH is proud to have been selected by Hunt Construction for this challenging and rewarding endeavor.

Project Team

General Contractor

Hunt Construction Group

Mechanical Contractor

BCH Mechanical, Inc.

Construction Cost

\$5,100,000.

Completion Date

August 2006
