

BCH

MECHANICAL, INC.

Westfield Shopping Town-Countryside

The Westfield Group is the largest retail property group in the world with shopping centers in four countries with a total value in excess of \$33.2 billion. They purchased and are revitalizing this facility formerly known as Countryside Mall in Clearwater, Florida

BCH Mechanical was chosen to design/build this turnkey project including a new complete replacement of their Chiller System. BCH was selected for their ability to replace the existing chillers with two (2) new 900 ton machines without any down time. BCH installed new chillers, pumps, piping and controls without the shoppers even being aware of the work going on.

With the central plant on the 2nd floor, it required us to cut open the side of the building to get new systems in the building. The entire project was completed in 90 days.

Project Team

Owner

Westfield Group

Mechanical Engineer

Advanced Systems Engineering

Mechanical Contractor

BCH Mechanical, Inc.

Construction Cost

\$2,300,000.

Completion Date

Spring 2006
